1. Description of the Product

Information on Underlying

Reference Portfolio

The UBS CIO EM(U) Winners Equity Preference Portfolio (the "**Reference Portfolio**") is a notional Swiss Franc ("**CHF**" or the "**Reference Portfolio Currency**") denominated reference portfolio that intends to replicate the UBS CIO EM(U) Winners Equity Preference List, as amended from time to time (the "**Target Portfolio**") in accordance with the provision in the description of the Reference Portfolio (the "**Reference Portfolio Description**") in the Annex. The UBS CIO EM(U) Winners Equity Preference List represents a list of European stocks (each a "**Stock Constituent**"). The Reference Portfolio will be partially FX hedged through the use of FX forwards (each a "**FX Constituent**") (together the "**Constituents**") in a systematic, monthly Currency Hedge, as further described herein. The Reference Portfolio may also include from time to time a cash position denominated in the Reference Portfolio Currency (the "**Cash Position**", together with the Constituents, the "**Reference Portfolio Components**"). The Cash Position will accrue interest at the prevailing reference rate (the "**Reference Rate**"), as described in Annex 1, which may be negative from time to time. Finally, the Cash Position will be negatively impacted by the deduction of certain fees as described under the "Fees" definition in Section 1 ("Description of the Product") of this document.

Whilst the Redemption Amount is linked to the market value of the Reference Portfolio Components, the Issuer is not obliged to invest the proceeds of the issuance of the Portfolio Certificates in any Constituents at any time and the holders of the PERLES do not have any direct interest in, or beneficial ownership in any Constituent at any time.

Redemption

Redemption Amount Each Certificate entitles the investor to receive on the Redemption Date an amount in the Settlement Currency (the "**Redemption Amount**"), as calculated by the Calculation Agent, according to the following formula:

$$\text{Denomination} \times \text{Max} \left(0 ; \frac{\text{Final Reference Portfolio Level}}{\text{Initial Reference Portfolio Level}} \right)$$

Where:

"**Final Reference Portfolio Level**" means the value of the Reference Portfolio as determined by the Calculation Agent on the Expiration Date, the Early Termination Date or the Automatic Early Termination Date (as applicable) and subject to Unwind Disruption, as the sum of:

- (i) the sale proceeds, as determined by the Calculation Agent in its reasonable discretion, that would be realized by a notional investor (in the same position as the Issuer) when selling and/or, as the case may be, unwinding the prevailing Constituents comprising the Reference Portfolio; and
- (ii) the value of the Cash Position minus any accrued but not yet deducted Adjustment Fee and/or Reference Portfolio Fee.

In the event that a notional investor (in the same position as the Issuer) would be unable to unwind its investment in the Constituents by the Expiration Date, the Early Termination Date or the Automatic Early Termination Date, as applicable (such event an "**Unwind Disruption**"), the Issuer reserves the right to postpone the Expiration Date, the Early Termination Date or the Automatic Early Termination Date in accordance with the Market Disruption Events provisions below.

Please note that the Redemption Amount may be less than the initially invested capital.

Early Termination by Issuer The Issuer is entitled to terminate the Certificates early in full subject to the following notice period:

Quarterly, i.e. as of each 30 June, 30 September, 31 December and 31 March of each year (the "**Early Termination Date**"), subject to at least 30 Business Days prior notice being given to the investors (provided in each case if such day is not a Constituents Business Day, then the immediately following Constituents Business Day shall be the Early Termination Date). The first possible Early Termination Date will be 30 September 2018. There is no early termination right for the investor in the Certificates.

Automatic Early Termination Event and Automatic Early Termination An Automatic Early Redemption Event is deemed to have occurred if the Issuer becomes aware that the UBS CIO EM(U) Winners Equity Preference List which this Product intends to replicate has been terminated or withdrawn. The day on which the Issuer becomes aware of such termination or withdrawal shall be the "**Automatic Early Termination Date**". For the avoidance of doubt, the Automatic Early Termination Date may or may not occur on a Business Day.

Reference Portfolio Level Except on the Expiration Date, the Early Termination Date or the Automatic Early Termination Date, as applicable, the Calculation Agent shall calculate the Reference Portfolio Level in its own reasonable discretion in respect of each Business Day, subject to a Market Disruption Event (each a "**Reference Portfolio Calculation Date**").

The Reference Portfolio Level in respect of each Reference Portfolio Calculation Date is the sum of (i) the closing price or value of each Constituent on such Reference Portfolio Calculation Date, and (ii) the value of the Cash Position.

For the avoidance of doubt, the Reference Portfolio Level in respect of the Expiration, Early Termination Date or Automatic Early Termination Date, as applicable, shall be calculated by the Calculation Agent in accordance with the provisions under "**Redemption Amount**" above.

Rebalancing

A Rebalancing will be initiated on any Target Portfolio Implementation Date following the Pricing Date, effective as soon as reasonably practicable, as determined by the Calculation Agent in a commercially reasonable manner, subject to the occurrence of a Market Disruption Event on such Constituents Business Day. A single Rebalancing may comprise of a change to more than one Component. A Rebalancing shall not be effective if, on such Target Portfolio Implementation Date, a Rebalancing in respect of any previous Target Portfolio Implementation Date has not yet been completed. Also, for the avoidance of doubt, shall a new Target Portfolio Event (and related Target Portfolio Publication Date) occurs before the Target Portfolio Implementation Date of the immediately preceding Target Portfolio Event (and related Target Portfolio Publication Date), such previous Target Portfolio Event (and related Target Portfolio Publication Date) shall not be implemented.

As soon as reasonably practicable on a Target Portfolio Publication Date, the Calculation Agent will determine the target weight of each Stock Component (the "**Target Weight**") that shall form part of the Reference Portfolio following such Rebalancing in its reasonable discretion. The Calculation Agent will determine the exact number of Stock Constituents based on prevailing market conditions in its reasonable discretion. Such number may deviate from the exact Target Weight.

The Calculation Agent may not rebalance the Reference Portfolio following a Target Portfolio Publication Event in the following circumstances:

- (i) The Calculation Agent determines that a Hedging Disruption Event has occurred in relation to any Stock Constituent. In this paragraph, "**Hedging Disruption Event**" means the determination by the Calculation Agent that it would not be reasonably practicable or it would otherwise be undesirable, for any reason, for a notional Investor wholly or partially to establish, re-establish, substitute or maintain any hedging transaction which in the determination of the Calculation Agent would be necessary or desirable to hedge the obligations of an issuer of securities linked to the performance of the Reference Portfolio (such reasons may include, but are not limited to (i) any material illiquidity in the market for any Stock Constituent, (ii) a change in any applicable law (including, without limitation, any tax law) or the promulgation of, or change in, the interpretation of any court, tribunal or regulatory authority with competent jurisdiction of any applicable law (including any action taken by a taxing authority); or (iii) the general unavailability of market participants who would agree to enter into any such hedging transaction on commercially reasonable terms or at all; and
- (ii) the Calculation Agent determines that it would not be reasonably practicable for a notional Investor in the same position as the Issuer to make purchases and/or sales of Stock Constituent due to compliance, liquidity, unreasonable market impact, regulatory, reporting or reputational constraints, take-over considerations, internal restrictions or lack of internal approval.

Target Weight

As soon as reasonably practicable on a Target Portfolio Publication Date, the Calculation Agent will determine the Target Weight of each Stock Constituent that shall form part of the Reference Portfolio following such Rebalancing in its reasonable discretion and according to the following methodology:

- (i) Subject to the following paragraphs, all the European stocks that are rated "Most Preferred" shall form part of the Reference Portfolio following such Rebalancing;
- (ii) However, any European stock rated "Most Preferred" that does not meet the Liquidity Criteria as defined hereafter and as reasonably determined by the Calculation Agent shall not form part of the Reference Portfolio following such Rebalancing;

Please note that calls made to the numbers marked with an asterisk (*) may be recorded. Should you call one of these numbers, we shall assume that you consent to this business practice.

- (iii) Furthermore, if the Calculation Agent determines that it would not be reasonably practicable for a notional Investor in the same position as the Issuer to make purchases and/or sales of any European stock rated "Most Preferred" due to compliance, regulatory, reporting or reputational constraints, take-over considerations, internal restrictions or lack of internal approval, such stock shall not form part of the Reference Portfolio following such Rebalancing;
- (iv) Once the Calculation Agent has determined the relevant list of all the European stocks that are rated "Most Preferred" shall form part of the Reference Portfolio following such Rebalancing, the portfolio of such stocks shall be equally weighted. As such, the Target Weight of each Stock Constituent that shall form part of the Reference Portfolio following such Rebalancing shall be equal to one divided by the expected number of stocks in the Reference Portfolio following such Rebalancing.

For the avoidance of doubt, the Target Weight of the Cash Position following a Rebalancing shall be computed by the Calculation Agent in its reasonable discretion as the difference between the Reference Portfolio Level immediately before a Rebalancing is implemented and the market value of the Stock Constituents immediately following such rebalancing, taking into account the relevant Adjustment Fees, if any. Such Target Weight can be negative from time to time.

Liquidity Criteria

Means a 3 month average daily volume greater than or equal to EUR 15,000,000.00, as determined by the Calculation Agent in its reasonable discretion.

Reference Rate

The Reference Rate is observed on every day and shall be equal to (i) the Federal Funds Target Rate – Upper Bound (Bloomberg page: FDTR <Index>) (ii) plus the CHF Forward Implied 3 Month Rate (Bloomberg Page: CHF13M Curncy) (iii) minus the USD 3 Month LIBOR Rate (Bloomberg Page: US0003M Index) (each a "**Relevant Screen Page**") (each a "**Reference Rate Component**"), which for the avoidance of doubt may be negative from time to time.

If one or more Relevant Screen Page is not available or if a Reference Rate Component is not displayed, the Reference Rate Component shall be the equivalent rate as displayed on the corresponding page of another financial information service. If one or more Reference Rate Component is no longer displayed in one of these forms, the Calculation Agent is entitled to specify at its reasonable discretion a successor Reference Rate Component calculated on the basis of the standard market practices applicable at that time as the Reference Rate Component.
