Redemption Date	Means the 5 <sup>th</sup> Business Day following the Expiration Date or the Effective Exercise Date (in any case subject to Market Disruption Event Provisions).
Closing Date (for Swiss Tax purposes)	1 <sup>st</sup> January of each year.
Issuer Call Right	Yes, please refer to the respective definition.

## Redemption

The Investor is entitled to receive from the Issuer on the Redemption Date an amount in the Settlement Currency of 100% of the Strategy Level on the Expiration Date or the Effective Exercise Date, as applicable.

Strategy Level On any Index Business Day  $t$  (including for the avoidance of doubt the Expiration Date or Effective Exercise Date), the Strategy Level ( $S_t$ ) is calculated as:

$$S_t = S_{t-1} \times \left( \frac{U_t}{U_{t-1}} - SF \times \frac{\text{Day Count}}{360} \right)$$

Where:

$S_{t-1}$  = The Strategy Level in respect of the Index Business Day immediately preceding Index Business Day  $t$ . The Strategy Level in respect of the Pricing Date shall be 100.00

$U_t$  = In respect of an Index Business Day that is not an Expiration Date or Effective Exercise Date, the Underlying Level in respect of Index Business Day  $t$ , calculated in accordance with the provisions in the Appendix.

In respect of an Index Business Day that is an Expiration Date or Effective Exercise Date, as the case may be, the Underlying level as determined by the Calculation Agent in its sole discretion acting in good faith in a commercially reasonable manner, taking in account the levels achieved by the Issuer in closing out its hedging transactions in respect of the Underlying;

$U_{t-1}$  = The Underlying Level in respect of Index Business Day immediately preceding Index Business Day  $t$ , calculated in accordance with the provisions in the Appendix;

SF = The Structuring Fee; and

Day Count = The number of calendar days from (and excluding) the Index Business Day immediately preceding Index Business Day  $t$ , to (and including) Index Business Day  $t$ .

In case a notional investor (in the same position as the Issuer) would be unable to unwind its investments in the Underlying on the Expiration Date or the Effective Exercise Date, as applicable, or if such unwinding on the Expiration Date or the Effective Exercise Date, as applicable, would lead to a commercially unreasonable result, as determined in the reasonable discretion of the Calculation Agent, the Issuer reserves the right to determine the Certificate Level over a period of several consecutive Index Business Days in which a notional investor in the Underlying would be able to fully unwind the Underlying for a commercially reasonable price. In such case the Redemption Date might be postponed accordingly.

## Product Structure

With PERLES, Investors will participate 100% in the positive and negative performance of the Underlying (subject to the deduction of the Structuring Fee). PERLES are a product suitable for Investors who expect the Underlying to increase in value.

The tax information only provides an indicative general overview over the Swiss tax consequences linked to this product based on the tax laws and the practice of the tax administration at the time of issue. Tax laws and the practice of tax administrations may change, possibly with retroactive effect.

## Classification

---

This Product does not represent a participation in any of the collective investment schemes pursuant to Art. 7 ff of the Swiss Federal Act on Collective Investment Schemes (CISA) and thus does not require an authorisation of the Swiss Financial Market Supervisory Authority (FINMA). Therefore, Investors in this Product are not eligible for the specific investor protection under the CISA. Moreover, Investors in this Product bear the issuer risk.

Furthermore, this Product does not benefit from any depositor protection under Art. 37b under the Swiss Federal Law on Banks and Savings Banks (Banking Act) or other forms of deposit insurance under any other law as might be applicable to this Product.

## 2. Prospects of Profits and Losses

---

Market Expectation	Investors in this Product expect the Underlying to trade positively.
Effect of the performance of the Underlying on redemption amount or on delivery obligation:	
- Positive performance	If the Underlying performs positively (net of the Structuring Fee), Investors realise a positive return.
- Sideways to slightly negative performance	If the Underlying performs sideways to slightly negative (net of the Structuring Fee), the value of the Product will remain constant or decreases.
- Pronounced negative performance	Investors may lose some or in the worst case all of the investment as they are fully exposed to the negative performance of the Underlying.
Maximum Return	The profit potential is unlimited.
Maximum Loss	Investors may lose some or all of the investment as they are fully exposed to the performance of the Underlying.

## 3. Significant Risks for Investors

---

General risk warning	Potential Investors should understand the risks associated with an investment in the Product and shall only reach an investment decision after careful considerations with their legal, tax, financial and other advisors of (i) the suitability of an investment in the Product in the light of their own particular financial, fiscal and other circumstances; (ii) the information set out in this document and (iii) the Underlying(s). The following is a summary of the most significant risks. Further risks are set out in the Product Documentation.
Risk Tolerance	Investors in this Product should be experienced Investors and familiar with both derivative products and the Underlying asset class of this product.

### Product specific risks

---

Loss Potential	Investors may lose some or in the worst case all of the investment as they are fully exposed to the negative performance of the Underlying.
Capital Protection (at Expiry)	None
Risk Potential in comparison to a direct investment in the Underlying	The risk potential is similar as with a direct investment in the Underlying.
Issuer Call right	Yes. Please refer to the respective definition in Section 1, «General Information».
Currency risk	Investors should be aware that the <b>Core Underlying Level (as defined in the Appendix) is calculated in USD</b> and the <b>Underlying Level is calculated in CHF</b> . As a result the value of this Product is exposed to the corresponding FX exchange rate. The currency risk is partially, and not entirely, hedged through the use of forward foreign exchange contracts.  The relevant FX spot exchange rate may be influenced by unpredictable factors, including fluctuations in currency exchange rates. The value of the Underlying, and therefore, the investment, may be affected by various and often unpredictable factors, including, but not limited to, the exchange rate and economic, financial, social and political conditions globally and in particular countries. The exchange rate and the liquidity and trading values of, and amounts payable with respect to, the Product may be affected by the actions of sovereign governments that may directly or indirectly impact the Underlying. The market value of the Product may fluctuate between the Pricing Date and the Expiration Date at the expiration time. The Calculation Agent will

Price Source Disruption Event	<p>determine the settlement on maturity.</p> <p>It may become impossible to obtain the relevant Underlying Level or Core Underlying Level during the lifetime of the Product and/or on the Expiration Date or the Effective Exercise Date, as applicable, due to one or more of the price sources normally used in the relevant market for the Underlying or Core Underlying being unavailable because an unscheduled bank closure is declared on short notice in the relevant country or due to the occurrence of any other disruption (each a "Price Source Disruption Event"). The Calculation Agent will determine in good faith in a commercially reasonable manner whether a Price Source Disruption Event has occurred.</p> <p>A Price Source Disruption Event may lead to (i) a postponement of the Expiration Date or the Effective Exercise Date, as applicable, and therefore of the redemption payment, (ii) to the use of an alternative source for the relevant Underlying Level or Core Underlying Level and or (iii) to the unilateral determination of the applicable Underlying Level or Core Underlying Level by the Calculation Agent.</p> <p>Such postponement, use of alternative price source and/or determination of the applicable Underlying Level or Core Underlying Level by the Calculation Agent may affect, materially or otherwise, the Redemption amount which the Investor will receive.</p>
Extraordinary termination risk	<p>The Product contains terms and conditions that allow the Issuer to terminate and redeem the Product prior to the Redemption Date. In case of such extraordinary termination, the Issuer shall pay to the Investors an extraordinary termination amount as determined by the Calculation Agent which is usually equivalent to the market value of the Product. Potential Investors should note that the extraordinary termination amount may deviate from and may be considerably below the amount which would be payable pursuant to the final redemption provisions on the Redemption Date. Investors are not entitled to request any further payments on the Product after the Redemption Date.</p>
Adjustment risk	<p>Investors should be aware that it cannot be excluded that certain events occur or certain measures are taken (by parties other than the Issuer) in relation to the Underlying(s) or Core Underlying(s) which can lead to changes to the Underlying(s) or Core Underlying(s) or its concepts (e.g. corporate events of a company whose shares constitute an Underlying or Core Underlying, Market Disruption Events or other circumstances affecting normal activities). In the case of the occurrence of such events or measures, the Issuer and/or the Calculation Agent are entitled to effect adjustments according to the Product Documentation. Such adjustments might have a negative impact on the value of the Product.</p>
Illiquidity risk in secondary market	<p>The Issuer or the Lead Manager, as applicable, intends, under normal market conditions and using commercially reasonable efforts, to provide bid and/or offer prices for this Product on a regular basis. Potential Investors should note that any prices will be determined by the Issuer or the Lead Manager, as applicable, in its sole discretion, will typically include a spread and therefore may deviate from the market value of the Product. Hence, Investors might sell at a price considerably lower than the actual price of the Product at the time of its sale. By selling the Product in the secondary market Investors may receive less than the capital invested.</p>
Market Disruption risk	<p>Investors are exposed to market disruption events (such as trading disruption, exchange disruption and early closure of the relevant exchange), which could have an impact on the redemption amount through delay in payment, change in value or suspension of trading in the Product in the secondary market.</p> <p>Where the Issuer is completely unable to enter into hedging transactions, for reasons not related to activities of the Issuer, or when entering into such hedging transactions would lead to a commercially unreasonable result, for reasons not related to activities of the Issuer, as determined in the reasonable discretion of the Issuer or the Lead Manager, as applicable, the spread between the bid and offer prices in the secondary market may be temporarily expanded, in order to limit the economic risks of the Issuer.</p> <p>For a detailed description of such events and their effects please refer to the Product Documentation.</p>

Calculation Agent's discretion	The Calculation Agent has a broad discretionary authority to make various determinations and adjustments under the Products, any of which may have an adverse effect on the value and/or the amounts payable under the Products. Prospective investors should be aware that any determinations made by the Calculation Agent may have an impact on the value and financial return of the Products. Where the Calculation Agent is required to make a determination it may do so without taking into account the interests of the holders of the Product.
Withholding tax	Investors in this Product should note that any payment under this Product may be subject to withholding tax (such as, inter alia, Swiss Withholding Tax, and/or withholding related to FATCA or 871(m) of the US Tax Code). <b>Any payments due under this Product are net of such tax.</b> Please refer to the General Terms and Conditions for detailed information. If the Issuer is required to withhold any amount pursuant to Section 871(m) or FATCA of the U.S. Tax Code, the Issuer will not be required to pay additional amounts with respect to the amount so withheld.

### Risk Factors relating to the Issuer

In addition to the market risk with regard to the development of the Underlying, each Investor bears the general risk that the financial situation of the Issuer could deteriorate. The Products constitute immediate, unsecured and unsubordinated obligations of the Issuer, which, particularly in case of insolvency of the Issuer, rank *pari passu* with each and all other current and future unsecured and unsubordinated obligations of the Issuer, with the exception of those that have priority due to mandatory statutory provisions. The general assessment of the Issuer's creditworthiness may affect the value of the Products. This assessment generally depends on the ratings assigned to the Issuer or its affiliated companies by rating agencies such as Moody's, Fitch and Standard & Poor's.

The Issuer Ratings indicated in this document reflect the situation at the time of issuance and may be subject to changes. The actual Issuer Ratings at any given time can be seen on the Issuer's website ([www.ubs.com](http://www.ubs.com)) under "Analysts & Investors".

## Appendix

This Appendix describes the methodology in accordance with which the Underlying Level in respect of any Index Business Day shall be calculated.

The Underlying is a notional strategy exposure to the CBOE Standard & Poor's 500 2% OTM BuyWrite Index (the "**Core Underlying**") along with a currency hedging overlay comprising of notional foreign exchange forward contracts. The Core Underlying is an index designed to track the performance of a hypothetical buy-write strategy which involves a notional long exposure to the S&P 500 Total Return Index and a notional short exposure (rolled periodically) to a call option with a target strike price of 102%.

<b>CBOE Standard &amp; Poor's 500 2% OTM BuyWrite Index</b> Bloomberg code: BXY Index	USD 2,015.49

### Calculation of the Underlying Level

In respect of the Pricing Date, the Underlying Level shall equal 100.00.

In respect of any subsequent Index Business Day t (with the exception of the Expiration Date or the Effective Exercise Date), the Underlying Level ( $U_t$ ) is calculated as:

$$U_t = U_r \times \left[ \frac{CU_t}{CU_r} \times \frac{USDCHF_t}{USDCHF_r} - \left( \frac{USDCHF \text{ Forward}_{t,r+1}}{USDCHF \text{ Forward}_{r,r+1}} - 1 \right) \right]$$

Where:

$U_r$ =	The Underlying Level in respect of the immediately preceding Rebalancing Date. For the avoidance of doubt, if Index Business Day t is also a Rebalancing Date, then the Underlying Level in respect of the immediately preceding Rebalancing Date shall be used.
$CU_t$ =	The official Core Underlying Level in respect of Index Business Day t.
$CU_r$ =	The official Core Underlying Level in respect of the immediately preceding Rebalancing Date. For the avoidance of doubt, if Index Business Day t is also a Rebalancing Date, then the official Core Underlying Level in respect of the immediately preceding Rebalancing Date shall be used.
$USDCHF_t$ =	The foreign exchange rate in the convention USD:CHF in respect of Index Business Day t, as published on the FX Rate Price Source.
$USDCHF_r$ =	The foreign exchange rate in the convention USD:CHF in respect of the immediately preceding Rebalancing Date. For the avoidance of doubt, if Index Business Day t is also a Rebalancing Date, then the foreign exchange rate in respect of the immediately preceding Rebalancing Date shall be used. In respect of the Pricing Date, $USDCHF_0$ shall be 0.99870.
$USDCHF \text{ Forward}_{t,r+1}$ =	The forward foreign exchange rate in the convention USD:CHF in respect of Index Business Day t with a maturity date that is the immediately following Rebalancing Date, as determined by the Calculation Agent with reference to the foreign exchange rate published on the FX Rate Price Source.
$USDCHF \text{ Forward}_{r,r+1}$ =	The forward foreign exchange rate in the convention USD:CHF in respect of the immediately preceding Rebalancing Date with a maturity date that is the immediately following Rebalancing Date, as determined by the Calculation Agent with reference to the foreign exchange rate published on the FX Rate Price Source. For the avoidance of doubt, if Index Business Day t is also a Rebalancing Date, then the forward foreign exchange rate in respect of the immediately preceding Rebalancing Date with the maturity date that is the current Index Business Day t shall be used. In respect of the Pricing Date, $USDCHF \text{ Forward}_0$ shall be 0.99606.

The FX Rate Price Source is the foreign exchange rate as published on Bloomberg Page WMCO in respect of the fixing at 16:00 London time, or any successor page as determined by the Calculation Agent. For the avoidance of doubt, if the foreign exchange rate is expressed in the convention CHF:USD, then one divided by such published rate shall be used.

The official Core Underlying Level constitutes the closing or settlement price of the Core Underlying as published on the Core Underlying Price Source, which is the Bloomberg page stated under "Information on Underlying" above.

The Rebalancing Date shall be the last Index Business Day in each calendar month.
