

Disruptive Technologies

Innovative leaps with revolutionary explosive force

Open End PERLES on the ROBO Global Disruptive Technology Index

Disruptive Technologies explained

What have the steam engine, the internet and smartphones got in common? The emergence of all three technologies listed by way of example triggered euphoria and a spirit of optimism in industry and society. The steam engine heralded the start of the industrial age, the internet drove forward digitalization while smartphones enable constant access to the virtual world. All three technologies instigated an innovative leap and radically changed their respective living and working environments. Clayton M. Christensen from Harvard Business School called technologies with such penetrating power "disruptive technologies". Since the publication of the book "The Innovators Dilemma" in 1995 and the scientific paper "Disruptive Technologies: Catching the Wave" the defining feature of a disruptive innovation is that it breaks up existing market structures and dictates completely new ground rules to the market.

What current technologies have that potential?

Umpteen investors ask themselves this question day in, day out. A possible answer is provided by the ROBO Global Disruptive Technology NTR Index. The index provider ROBO Global Partners analyses and selects industries with the potential to create disruptive technology and thereby trigger innovative leaps on a broad scale.

The index solution

Disruptive technologies are subject to changing times. What is considered disruptive today will be superseded tomorrow. The ROBO Global Disruptive Technology NTR Index responds to this momentum by continually revising the composition of the index using a "top-down" approach.

Selection of industries

The starting point for selecting equities is to identify industries that the ROBO Global Partners Index committee deems capable of creating disruptive technologies. The industries contained in the index can therefore be replaced and the number

CHF	30298122	DISCHU
USD	30298121	DISUSU

ubs.com/disruptive

of industries may fluctuate, but the index always includes between eight and 20 industries.

Selection of equities

In a second step suitable equities are chosen from the equities universe based on a set of rules. Each industry must be represented by a minimum of five and a maximum of 20 equities. All equities in the ROBO Global Disruptive Technology NTR Index must be sufficiently tradable. Firstly, this requires a listing on a stock exchange that also offers unrestricted trading access to foreign investors. In addition, all index members must generate at least half their sales in one of the identified disruptive technology industries. Furthermore, to be included in the index, market capitalization must be at least 500 million US dollars and the average daily trading volume for the past three months must amount to at least 500,000 US dollars.

Both the industries in the index and the equities within an industry must be equally weighed in terms of the quarterly index adjustments.

The product solutions

The UBS Open End PERLES on the ROBO Global Disruptive Technology NTR Index mirrors the performance of the underlying index after deduction of the management fee of 0.75 percent p.a. one to one in Swiss francs (CHF) or US dollars (USD) without currency hedging. Any dividends of the index members are reinvested in the index. The products are of unlimited duration, meaning that a lasting investment in the future topic of disruptive technologies is possible.

Opportunities

- Equities-based participation in the growth potential of international companies focusing on disruptive technologies.
- Transparent and targeted index structure that can add new industries and index members at any time, in order to react quickly to new disruptive technologies.
- The industries are selected by the index provider ROBO Global Partners Limited, and the index is calculated by Solactive AG.
- Each industry is diversified by a minimum of 5 equities.
- Equal Weighting is restored on a quarterly basis.
- Tradable every trading day under normal trading conditions.
- No expiry.

Risks

- Industries focusing on disruptive technologies are mostly young areas of the economy where it is not yet certain whether the hopes placed in these technologies will be realized and which companies will actually become established.
- No capital protection: investors run the risk of losing their capital investment if the price of the underlying index worsens.
- As the values included in the index may be listed in different currencies and the product does not have any currency hedges, the investor may also be exposed to an exchange rate risk, which may adversely affect the value of the product.
- Investors bear the issuer risk and so could lose their capital investment if the issuer files for insolvency.
- The issuer intends to ensure liquidity in normal market phases on trading days. However, investors should realize that they may not be able to buy/sell the product at every point in time.
- The issuer has the right to cancel the product if certain conditions are met.

Neither UBS nor any of its affiliates, or their officers or employees, accepts any liability for any loss arising from use of the Information.

This presentation is not a basis for entering into a transaction. Any transaction between you and UBS will be subject to the detailed provisions of the term sheet, confirmation or electronic matching systems relating to that transaction. Clients wishing to effect transactions should contact their local sales representative.

This information is communicated by UBS AG and/or its affiliates ("UBS"). * (see below) UBS may from time to time, as principal or agent, have positions in, or may buy or sell, or make a market in any securities, currencies, financial instruments or other assets underlying the product to which this [term sheet / document] relates (the "Structured Product"). UBS may provide investment banking and other services to and/or have officers who serve as directors of the companies referred to in this [term sheet / document]. UBS's trading and/or hedging activities related to the Structured Product may have an impact on the price of the underlying asset and may affect the likelihood that any relevant barrier or relevant trigger event is crossed or triggered. UBS has policies and procedures designed to minimise the risk that officers and employees are influenced by any conflicting interest or duty and that confidential information is improperly disclosed or made available. UBS may pay or receive brokerage or retrocession fees in connection with the Structured Product described herein. In respect of any Structured Product that is a security, UBS may, in certain circumstances, sell the Structured Product to dealers and other financial institutions at a discount to the issue price or rebate to them for their own account some proportion of the issue price. Further information is available on request. Structured Products are complex and may involve a high risk of loss. Prior to purchasing the Structured Product you should consult with your own legal, regulatory, tax, financial and accounting advisors to the extent you consider it necessary, and make your own investment, hedging and trading decisions (including decisions regarding the suitability of the Structured Product) based upon your own judgement and advice from those advisers you consider necessary. Save as otherwise expressly agreed in writing, UBS is not acting as your financial adviser or fiduciary in relation to the Product. UBS generally hedges its exposure to Structured Products, although it may elect not to hedge or to partially hedge any Structured Product. UBS's hedging activity may be conducted through transactions in the underlying asset, index or instrument or in options, futures or other derivatives related to the underlying asset, index or instrument on publicly traded markets or otherwise, and may have an impact on the price of the underlying asset. If a transaction is cash settled, UBS will generally unwind or offset any hedge it has for such Structured Product in close proximity to the relevant valuation time or period. In some cases, this activity may affect the value of the Structured Product. Unless stated otherwise in this document, (i) this document is for information purposes only and should not be construed as an offer, personal recommendation or solicitation to purchase the Structured Product and should not be treated as giving investment advice, and (ii) the terms of any investment in the Structured Product will be exclusively subject to the detailed provisions, including risk considerations, contained in the more detailed legal documentation that relates to the Structured Product (being the confirmation, information memorandum, prospectus or other issuer documentation as relevant). UBS makes no representation or warranty relating to any information herein which is derived from independent sources. This document shall not be copied or reproduced without UBS's prior written permission. In respect of any Structured Product that is a security, no action has been or will be taken in any jurisdiction that would permit a public offering of the Product, save where explicitly stated in the issuer documentation. The Structured Product must be sold in accordance with all applicable selling restrictions in the jurisdictions in which it is sold.
